ROMANIZATION OF THAI

BGN/PCGN 2002 Agreement

This system was developed by the Royal Institute of Thailand, and was officially endorsed by the government of Thailand in 2000 and approved for use in the United Nations in 2002. The system is a revised version of the 1967 Royal Institute of Thailand system previously used by BGN and PCGN. This revision principally affects vowels, where additional romanizations have been introduced to provide further differentiation. Indications of vowel length and tone are not included in the system.

Word boundaries are not ordinarily shown in Thai writing. Characters are not always written in the sequence in which they should be romanized. Characters which are phonologically superfluous, and characters which indicate tone, should not be romanized.

Since correct identification of the words which appear in any particular name and knowledge of their correct pronunciation are essential in the romanization of Thai, each word should be verified in a dictionary of pronunciation, or the name should be verified in an official Thai place-names document which provides Roman-script spellings.

For some consonant characters, two different Roman equivalents are shown in the table. The first equivalent is for use in syllable-initial position and the second, for use in syllable-final position. The Thai characters $\mathfrak A$ and $\mathfrak A$ (row 4), $\mathfrak A$ (row 12), $\mathfrak A$ (row 13), $\mathfrak A$ (row 19), and $\mathfrak A$ (row 20) do not appear at the end of syllables in Thai words. [* = rare or obsolete character].

CONSONANT CHARACTERS

	Thai	Romanization	(See note 1)	
		Syllable - initial	Syllable - final	Notes
1.	ก	k	k	
2.	ขฆคฅ* ฃ*	kh	k	
3.	v	ng	ng	
4.	จ ฉชฌ	ch	t	
5.	លូ	У	n	
6.	ฎ ฑ ⁷ ด	d	t	
7.	ฏ ต	t	t	
8.	ฐฑ ⁷ ฒถท²ธ	th	t	
9.	ณน	n	n	
10.	บ	b	р	

11.	ป	р	р						
12.	ผพภ	ph	р						
13.	ત્ર મ	f	р						
14.	ม	m	m						
15.	ឧ	У	У	(See the vowel table, rows 9-14 and 20.)					
16.	5 ²	r	n						
17.	ล ฬ	I	n						
18.	J ₃	w	W	(See the vowel table, rows 14-20.)					
19.	ซ ศ ษ ส	S	t						
20.	ห ⁴ ฮ	h	h						
21.	อ ⁵	(See the vowel tak	(See the vowel table, rows 8 and 12-15, and note 6.)						

VOWEL CHARACTERS

Each \odot shown below represents a Thai consonant character.

			Romanization			
1.	ೕ	്ഠ	ി	o ¹		a
2.	ាំ					am
3.	ĵ	ី				i
4.	Ģ	Ç				u
5.	៊ី	ឺ	ឺ១			ue
6.	ા	េះ	เ็อ			e
7.	េ	េះ	แ็			ae
8.	ি	ែះ	เาะ	ാ	01	0
9.	েগ্ৰ	เอะ	េិ			oe
10.	ើย	េីខ				ia

11.	េ	ৈ	័ย	ไ่ย	าย	ai
12.	ុំ					ui
13.	ែព	<u></u> ១ย				oi
14.	េខ					oei
15.	ាย					uai
16.	เือย					ueai
17.	ັ ງະ	័ា	ာ ³			ua
18.	เือ	เือะ				uea
19.	เำ	ാാ				ao
20.	ិរ					io
21.	េว	ເ໊ົາ				eo
22.	ແື້ລ	ແാ				aeo
23.	เืยว					iao
24.	ฤ					rue, ri, roe (according to pronunciation)
25.	ฤา					rue
26.	ฦ	ฦา				lue

NOTES

- 1. A Thai consonant character with no accompanying vowel mark or diacritical mark may be romanized with the vowel letter a or o: ปฐม → pathom, พลบ → phlop. Pronounced consonants and vowels which are omitted in Thai writing should be reflected in romanization: ศิลปะ → sinlapa, ทัศนะ → thatsana.
 - When a single consonant character represents both the final consonant of one syllable and the initial consonant of the next syllable, both consonants should be reflected in romanization: ศักราช → sakkarat, ราชสีห์ → ratchasi. Consonant and vowel characters written in misleading order should be romanized as pronounced: แบบง → khanaeng, เบย่า → khayao; but note: เทวา → thewa.
- 2. ทุธ may be romanized s, thora, or thr at the beginning of a word, according to pronunciation: ทุธาย → sai, ไทร → sai, ทุธราช → thorarat, ทุรัส → thrat; but note: ที่ราบ → thirap. At the end of a word, ทุธ should be romanized thon (ศูนทร → sunthon) or, if silent, should not be romanized.
 - รร should generally be romanized a or an: กรรม → kam, กรรไกร → kankrai; but note: กรรมการ → kammakan.
 - ร should not be romanized, if silent: จริง \rightarrow ching, สามารถ \rightarrow samat; but note: จริต \rightarrow charit.
 - Otherwise, 5 at the beginning of a syllable, whether or not preceded in the same syllable by a character from the consonant table, row 1, 2, 7, 8, 11, or 12, should generally be romanized r: รักแรก → rakraek, ตระการ → trakan. At the end of a syllable, 5 should generally be romanized n or on: ควร → khuan, นคร → nakhon.
- 3. ว at the beginning of a syllable should be romanized w: วงเวียน → wongwian. Between two consonant characters in a single syllable, ว should be romanized either ua or w: จวง → chuang, ควน → khwan. See the vowel table, rows 14-20.
- 4. ห at the beginning of a syllable and serving as a tone mark should not be romanized: หวอ → wo, หลืบ → luep; otherwise, ห should be romanized h: หวย → huai, โวหาร → wohan.
- 5. at the beginning of a syllable generally represents a glottal stop followed by a vowel: อรุณ → arun; less frequently it serves as a tone mark: อยาก → yak. In both instances, a should not be romanized. See the vowel table, rows 4, 7, 8, and 12-15.

- 6. In romanized forms, where a syllable ending with a vowel is followed by a syllable beginning with a vowel, a hyphen should be inserted at the syllable boundary: ไปรษณีย์อากาศ → praisani-akat, อายุอานาม → ayu-anam. A hyphen should also be inserted between the two consonant letters in the sequences kh, ph, and th, if those letters belong to different syllables: สิบหก → sip-hok, ลูกเห็บ → luk-hep. (See also Note 11.)
- 7. The rare character ๆ at the beginning of a syllable is romanized th or d, depending on pronunciation: นาที
 → nathi, บัณฑิต → bandit.
- 8. The silencing mark of written over the final character of a word, together with the vowel and/or consonant character(s) to which the mark applies, should not be romanized: กรรมสิทธิ์ → kammasit, พระอินทร์ → Phra-in.
- 9. The vowel shortening mark 🖔 and the tone marks 🖒, 💍, and 🖒 should not be romanized: ก็ → ko, ยี่ห้อ → yiho, กระต๊อบ → kratop. See the vowel table, rows 5, 6, and 18.
- 10. The reduplicating mark η indicates repetition of a syllable: ไหน \rightarrow nai, ไหน $\eta \rightarrow$ nainai.
- 11. In multi-syllable words, the final character of the preceding syllable and the initial character of the succeeding syllable may cause reading ambiguity. Therefore, a hyphen is used for syllable separations according to the following rules:
 - 11.1 A hyphen is inserted when the final character of the preceding syllable is a vowel and the initial character of the succeeding syllable is **ng** (ง), e.g. สง่า **Sa-nga**.
 - 11.2 A hyphen is inserted when the final character of the preceding syllable is $ng(\mathfrak{J})$ and the initial character of the succeeding syllable is a vowel, e.g. บังอร \rightarrow Bang-on.
 - 11.3 A hyphen is inserted when the initial character of the succeeding syllable is a vowel, e.g. สะอาด → sa-at, สำอาง → sam-ang.
- 12. Words followed by *paiyannoi* (ฯ), which shortens forms of a well-known word or words, are written out in full according to the reading rules, e.g. กรุงเทพฯ → **Krung Thep Maha Nakhon** (Bangkok), โปรดเกล้าฯ → protklao protkramom.

- 13. One must bear in mind that the romanization of Thai in this case employs the transcription method. Thus, tone marks (், ്, ്, and ்) and diacritical marks including the silencing mark (்) and the vowel shortening mark (்) are completely ignored. In order to transcribe Thai words correctly one must know how to read and pronounce them. There are many words that carry a character or characters that are not pronounced, such as สามารถ → samat (5 is silent), พรหม → Phrom (ห is silent), ลักษณม์ → lak (ษณม์ are silent), ธาตุ → that (் is silent), อินทรธณู → inthanu (หร are silent), and there are also a number of words in Thai where a syllable with an intruding vowel [a] must be inserted such as ปรารถนา → pratthana (5 is silent and [tha] is inserted), and รัตนา → rattana ([ta] is inserted) when pronouncing them.
- 14. When using geographical names romanized according to the previous 1967 version of the official Thai romanization system, it is essential to know that earlier no distinction was made between the vowels **u** and **ue** (**u** was used in both cases) and some diphthongs were romanized differently (**iu** for the character now romanized as **io**, **ieo** for the character now romanized as **iao**).
- 15. The Romanization columns show only lowercase forms but, when romanizing, uppercase and lowercase Roman letters as appropriate should be used.
