

Geographic Names Standardization Policy for North Macedonia

United States Board on Geographic Names
Foreign Names Committee

September 2019

1. Introduction

a. Purpose

This geographic names standardization policy has been prepared as an aid to those geographic names experts who are the working staff for the United States Board on Geographic Names (BGN) in the standardization of the geographic names of North Macedonia for United States Government use. The BGN and its staff work to effect consistent treatment of geographic name spellings in U.S. Government databases, publications, maps, and charts. The country policies are intended to satisfy, in part, the statutory requirements levied upon the BGN in Public Law USC 80-242 to develop principles, policies and procedures for geographic names standardization, and to promulgate decisions with respect to the principles of geographic nomenclature and orthography.

b. Background

North Macedonia, then known as 'Macedonia', declared its independence from the former Socialist Federative Republic of Yugoslavia after a referendum in September 1991. Immediately upon secession, Greece objected to the country's name, claiming that use of the term "Macedonia" by the new state implied irredentist aspirations toward the northernmost regions of Greece, also collectively named "Macedonia." North Macedonia joined the United Nations in 1993 under the name "the former Yugoslav Republic of Macedonia," pending resolution of the dispute with Greece. In February 1994, Greece imposed an economic embargo on North Macedonia, demanding changes to those sections of the constitution and state symbols deemed provocative by the Greek government. The embargo was lifted in 1995 after North Macedonia acceded to Greek demands. The Interim Accord, signed in 1995, regulated the agreements made between Greece and North Macedonia regarding use of the name "Macedonia" and laid the groundwork for negotiations mediated by the United Nations aimed at resolving the impasse.

The 1999 Kosovo War placed enormous strain on North Macedonia as 350,000 ethnic Albanian Kosovar refugees – equal to 17% of North Macedonia's population at the time – sought shelter in North Macedonia. Two years later, a short-lived civil conflict between ethnic Albanian insurgents and government forces led to the signing of the internationally-brokered Ohrid Framework Agreement (OFA) which granted greater civil and political rights to minority groups in North Macedonia, including decentralization of some functions to local government; amnesty to insurgents not under investigation for war crimes by the International Criminal Tribunal for the former Yugoslavia (ICTY); and official use of minority languages in areas populated by any ethnic group comprising at least 20% of the municipal population. Efforts to implement the reforms stipulated in the OFA are ongoing.

In 2004, boundaries for first-order administrative divisions were redrawn in order to redistribute power more equitably among ethnic communities. Minor changes to these boundaries occurred after the March 2013 local elections.

On June 17, 2018, the governments of the former Macedonia and Greece signed the Prespa Agreement, which stipulated that the Republic of Macedonia would change its name to the “Republic of North Macedonia.” Macedonia ratified the agreement on June 20, 2018 and made the necessary constitutional amendments to change the name on January 11, 2019. The Greek Parliament ratified the agreement on January 25, 2019. On February 14, 2019, the Permanent Mission of the Republic of North Macedonia to the United Nations provided a diplomatic note in which it requested that the United States Government hereafter refer to the country as the Republic of North Macedonia.

2. Languages and Language Policy

a. *Demographics*

According to the 2002 census, North Macedonia’s population is 2,022,547. Ethnic Macedonians comprise 64.18% of the population. Ethnic Albanians represent 25.17% of the population. Turks, Roma, Serbs, Bosniaks, Aromanians (Vlachs), and others each represent less than 5% of the population, with Turks being most numerous, followed by Roma, Serbs, etc.

Eastern Orthodox Christianity is the dominant religion in the country and is practiced, at least nominally, by about 65% of the population, mostly ethnic Macedonians and ethnic Serbs. Islam is the second largest religion, comprising approximately 33% of the population.¹ Islam is primarily practiced by ethnic Albanians, ethnic Turks, and substantial portions of the Roma and ethnic Macedonian communities. The remainder of the population adheres to various Christian denominations. The Jewish community of North Macedonia was nearly exterminated during the Holocaust and today numbers approximately 200 persons.²

b. *Languages*

Macedonian (ISO 639-3 code ‘mkd’) is an official language of North Macedonia at the national level. There are approximately 2 million speakers of Macedonian within North Macedonia. In municipalities where individual ethnic minorities constitute at least 20% of the population, the languages of those minority groups are official at the local level.

Macedonian is spoken throughout the country. Albanian is the second-most common language and is concentrated in the western, northwestern, and north-central parts of the country. The Turkish, Roma, Serbian, Bosniak, and Aromanian languages are spoken in widely dispersed pockets of the country by members of those respective ethnic groups.

¹ Census 2002, *Total Population of the Republic of Macedonia according to declaration by religion, by sex*. Republic of Macedonia State Statistical Office. 2002. Available online at: <http://www.stat.gov.mk/publikacii/knigaX.pdf> (Accessed 15 May 2014)

² Axis Invasion of Yugoslavia, *Holocaust Encyclopedia*. United States Holocaust Memorial Museum. 10 June 2013. Available online at: <http://www.ushmm.org/wlc/en/article.php?ModuleId=10005456> (Accessed 15 May 2014)

In 2018, the Macedonian Parliament approved a new Law on the Use of Languages that effectively made Albanian the second nationwide official language in the North Macedonia. Implementation of the law was delayed by the refusal of former President Gorge Ivanov's to sign the legislation. The law was published in North Macedonia's Official Gazette in early 2019, formally putting the law into effect, though to date, implementation remains slow and politically controversial.

c. Geographic Names Standardization

North Macedonia's Agency for Real Estate Cadastre (formerly State Institute for Geodetic Affairs) is responsible for producing the most authoritative topographic products used for the collection of geographic names. North Macedonia does not have a dedicated government body for the standardization of geographic place names.

Geographic features collected from authoritative Government-produced maps should be coded with the language code for Macedonian (ISO 639-2 code 'mkd').

3. Toponymic Policies

a. Script and Orthography

Macedonian is written using Macedonian Cyrillic script, which is characterized by a phonemic alphabet consisting of 31 individual characters.

b. Romanization

Macedonian Cyrillic script is romanized using the romanization system found in the BGN/PCGN Agreement on the Romanization of Macedonian Cyrillic (2013). This Romanization is reproduced in Appendix A of this policy.

c. Diacritics

Diacritics are shown in romanized name forms in accordance with the BGN/PCGN Agreement on the Romanization of Macedonian Cyrillic (2013).

The following diacritics are encountered in standardized name forms in North Macedonia:

<u>Character Name</u>	<u>Character</u>	<u>Unicode Value</u>
Capital C with wedge	Č	010C
Capital G with acute accent	Ǧ	01F4
Capital K with acute accent	Ǧ	1E30
Capital S with wedge	Š	0160
Capital Z with wedge	Ž	017D
Small c with wedge	č	010D
Small g with acute accent	ǧ	01F5
Small k with acute accent	ǧ	1E31
Small s with wedge	š	0161
Small z with wedge	ž	017E

d. Generic Terms

A generic is a term that describes a feature. Examples include words such as ‘river,’ ‘hill,’ and ‘lake.’ Except in cases in which the generic type does not identify the feature type, generics appearing in standardized name forms should be considered true generics. Otherwise, the term is considered to be a false generic and should not be collected as a generic.

A glossary of generic terms for North Macedonia is available in Appendix B.

e. Hyphenation, Capitalization, and Abbreviations

In accordance with BGN policy, the first letter of any generic term that appears as a separate word is capitalized, even if it occurs in lower case in official sources.

The initial letter of prepositions in place names is never capitalized, unless the preposition occurs as the first element in a compound place name.

Abbreviated names should be spelled out completely in BGN standard names.

g. Optional Long and Short Forms

Administrative division names are accorded long and short forms, e.g., Opština Jegunovce [long form]; Jegunovce [short form]. Short form names are to be ranked as the primary approved name and the long form as the secondary approved name.

Optional short forms are also provided for the BGN standard names of railroad stations, railroad stops, and populated places that contain prepositions. When supported by evidence from official sources, optional short forms are provided for BGN standard names that contain generic terms, e.g., *planina*, *reka*. In such cases the specific name element becomes the short form name.

Short forms are not added to variant names and should be removed when a formerly approved name becomes a variant name.

f. Numbers

Cardinal and ordinal numerals that occur in geographic names should be spelled out completely in BGN standard names.

4. Political Geography Policy**a. Country Name and Capital***Country Name*

Conventional long form:	Republic of North Macedonia
Conventional short form:	North Macedonia
Approved long form:	Republika Severna Makedonija
Approved short form:	Severna Makedonija

Cyrillic long form: Република Северна Македонија
 Cyrillic short form: Северна Македонија

Capital

Approved name: Скопје
 Cyrillic form: Скопје

b. First-order Administrative Divisions

North Macedonia is composed of 70 opština (municipalities, singular “opština”) and 1 grad (city). For maps of North Macedonia, please see Appendices C and D.

Appendix A. BGN/PCGN Agreement on Romanization of Macedonian Cyrillic

ROMANIZATION SYSTEM FOR MACEDONIAN CYRILLIC

BGN/PCGN 2013 Agreement

Macedonian was officially established as a literary language in Yugoslavia during World War II and is now the official language of North Macedonia. This romanization system replaces the BGN/PCGN 1981 agreement and adheres to the most widely-accepted standardization of Macedonian orthography.

	Macedonian				Romanization		Macedonian				Romanization
