## TABLE OF CORRESPONDENCES CYRILLIC - ROMAN

### BGN/PCGN 2000 Agreement

In 1995, the Uzbek government adopted the Roman alphabet to replace the existing Cyrillic alphabet. The presentation below provides a table of correspondences between the former Cyrillic alphabet and the current Roman alphabet. When Uzbek Roman-alphabet spellings are not available, this table can be used to convert Uzbek Cyrillic spellings. This table of correspondences supersedes the BGN/PCGN 1979 romanization system for Uzbek.

### NOTES

1. The letter sequence **ye** is used initially, after the vowel characters 1, 6, 7, 10, 16, 21, 29, 30, 31, and 32, and after characters 11 and 28.
2. The Unicode encoding of the apostrophe appearing in rows 27 and 28 is U+2019. The inverted apostrophe appearing in rows 32 (o´) and 34 (g´) is U+2018.
3. The Roman-script columns show only lowercase forms but, when applying the table, uppercase and lowercase Roman letters as appropriate should be used.
